

Connor Sharpe

AI Engineer & Software Developer

(310) 279-9283 · connor.sharpe92@gmail.com · Portland, OR · linkedin.com/in/connorsharpe92

AI engineer with expertise in multi-agent systems, distributed AI infrastructure, and behavioral governance middleware. Strong full-stack background (C#/.NET, Angular, TypeScript, Python) with hands-on experience architecting production AI platforms and directing coding agents to deliver robust, compliant software.

CORE SKILLS

AI Tooling (Claude, ChatGPT, Grok, Copilot) · Agentic Systems · LLM Governance & Drift Detection · TypeScript / Next.js · C# / .NET · Angular · Python · SQL · CI/CD · OWASP · Agile

PROFESSIONAL EXPERIENCE

Fillory AI

Nov 2025 – Apr 2026

AI Engineer: Framework Architect & Refactoring Technician

Portland, OR

- Architected a distributed AI development platform spanning multi-machine production infrastructure, a cloud code execution sandbox, and a GitHub-based CI/CD pipeline
- Built a behavioral governance middleware layer for LLM memory, drift detection, and identity coherence across multiple AI-powered applications
- Designed core infrastructure for an AI middleware platform (Portland Protocol) — including a phase-gated event system with architect review gates, versioned event envelopes, and a retryable webhook delivery pipeline
- Implemented semantic action normalization and hardened task state tracking in a TypeScript/Next.js agent system; diagnosed and resolved planner behavior regressions
- Led live production recovery of a 17-service AI platform — implementing process persistence and boot automation for zero-downtime hardware intervention with no data or service loss
- Built testing suites and compliance-focused dev environments; maintained vigilance against agent sycophancy and drift

Office Ally

Jan 2022 – Nov 2024

Software Developer

Vancouver, WA

- Led and reviewed code from offshore Angular team in Poland, ensuring maintainable, secure front-end development
- Built and tested .NET API endpoints in CI/CD environment, improving platform reliability and scalability
- Rebuilt signup process to simplify account creation; implemented ReCaptcha and encryption aligned with OWASP standards
- Leveraged Copilot AI to boost productivity; became Angular certified to review third-party code
- Improved deployment workflows using Octopus and developed a UTC time zone converter for localized data

Prosper IT Consulting

Feb 2020 – Dec 2021

Software Developer

Portland, OR

- Redesigned full user experience at learncodinganywhere.com, including registration, navigation, and progress tracking
- Built dynamic progress bars, notification system, dark mode, and drill-completion locking system

EDUCATION

Tech Academy

Software Development Bootcamp Graduate

Portland, OR

Loyola Marymount University

Bachelor of Arts in English: Creative Writing

Los Angeles, CA
